Internet site in the second level domain   (hereinafter referred to as the "Site") uses cookies and similar technologies to ensure maximum user convenience (hereinafter referred to as "Users"), providing personalized information, memorizing preferences in the Site content and marketing, also helping to get the information the Users need. By using this site, you acknowledge your consent to use cookies in accordance with this notice with respect to this type of files. If you do not give your consent that we use this type of files, then you must properly set up your browser settings or do not use the Site.

The following agreement concerns the rules of the Site regarding personal information provided to the administration of the Site by the Users.

This agreement concerns the use by the Site of the information received from the Users of the Site. This document also contains information about cookies and the use of cookies by the Site and third parties, and how you can reject such files.

While viewing any page of the Site on your computer, you download the page itself, as well as a small text file called "cookie". Cookies are used by many sites, because they allow you to do many useful things. For example, cookies can help the site owners to determine whether a particular computer (and, consequently, its User) was on this site before. This happens during a repeated visit to the site by checking the user's computer for the presence of a cookie file that has been left since the last visit.

The information that we receive through cookies helps us to provide our services to you in the most convenient way, and can also help us to understand our visitors.

A cookie is a small text file, often containing a unique anonymous identifier that is sent to your browser by the Site and stored on your computer's hard drive. Each site can send its cookies to your computer if your browser's settings allow it. At the same time (in order to preserve the confidentiality of your data) your browser opens the sites only to your own "cookies", but does not allow them to use the same cookies left by other sites.

Cookies store information about your preferences on the Internet. Users can configure their computers to automatically accept all cookies, or to warn them each time the site tries to write a cookie on the user's hard drive, or to reject any cookies at all. The latter option means that some personal services will not be provided to users, and also that the users who choose such settings will not be able to have full access to all sections of the Site.

Each browser is unique, so you should

t the User in obtaining the necessary information.

- in order to increase the effectiveness of the site and understand the interests of the visitors.

Some cookies are in effect from the time you log on to the site until the end of this particular session of work in the browser. When you close the browser, these files are no longer needed and are automatically deleted. Such cookies are called "session" cookies.

Some cookies are also stored in the interval between work sessions in the browser - they are not deleted when the browser is closed. Such cookies are called "persistent" files. The period of time the persistent files are stored varies for different cookies. We, as well as other companies, use persistent cookies for various purposes: for example, to determine how often you visit our pages or how often you return to them, how the use of the Site is changing over time, and to evaluate the effectiveness of advertising.

Cookies can be placed on your device by the administration of the Site. These cookies are called "own". Some cookies may be placed on your device by other operators. Such cookies are called "third party" files.

We, as well as third parties, can use cookies to find out when you visit the Site and how you use the content. Based on cookies, the information that is not associated with the identification of individual users (for example, the information about the operating system, the browser version or the URL from which the transition to this page is made, including from an email or an advertisement), can be collected and used by the cookies. Thus, we can provide you with more opportunities and analyze the ways of visiting the sites. This technology allows you to count the number of users who visited a particular section by clicking on a link from a specific banner outside this site, by a text link or images included in the newsletter. In addition, it serves as a tool for collecting general statistics about the use of the site for analytical research and helps us to optimize our sites and to offer advertisements in accordance with your

Advertisements can be given to you basing on your activity on the Internet or your use of mobile devices, as well as taking into account your actions while searching, your responses to one of our advertisements or e-

browser. The site does not control the use of these cookies and will not access them because of the special features of the cookies - only the third party that created them originally has access to them. Look for more information about these cookies on third party websites.

We use analytical web services, for example, Yandex.Metrics, GoogleAnalytics, Woopra, Piwik, which help us understand how people use our websites, and thus ensure their performance, usability and relevance of the content. These services use such data collection technologies as web beacons.
